# Author Index

Akagi, T., see Miyoshi, H. (1229) 149
Aoki, H., Tanaka, K. and Ida, S.
The genomic organization of the gene encoding a nitrate-inducible ferredoxin-NADP$^+$ oxidoreductase from rice roots (1229) 389
Astier, C., see Vernotte, C. (1229) 296

Bañuelos, M.A., Quintero, F.J. and Rodríguez-Navarro, A.
Functional expression of the ENA1(PMR2)-ATPase of *Saccharomyces cerevisiae* in *Schizosaccharomyces pombe* (1229) 233
Bassi, R., see Zucchelli, G. (1229) 59
Bendall, D.S. and Manasse, R.S.
Cyclic photophosphorylation and electron transport (1229) 23
Berden, J.A., see Boumans, H. (1229) 386
Berden, J.A., see Edel, C.M. (1229) 103
Bizouarn, T., Grimley, R.L., Cotton, N.P.J., Stilwell, S.N., Hutton, M. and Jackson, J.B.
The involvement of NADP(H) binding and release in energy transduction by proton-translocating nicotinamide nucleotide transhydrogenase from *Escherichia coli* (1229) 49
Blein, J.-P., see Stallaert, V.M. (1229) 290
Boumans, H., Berden, J.A. and Grivell, L.A.
cDNA sequence of subunit VIII of ubiquinol–cytochrome-*c* oxidoreductase from *Schizosaccharomyces pombe* (1229) 386
Brand, M.D., see Korzeniewski, B. (1229) 315
Braun, H.-P. and Schmitz, U.K.
Molecular structure of the 8.0 kDa subunit of cytochrome-*c* reductase from potato and its $\Delta\Psi$-dependent import into isolated mitochondria (1229) 181
Brdiczka, D., see Wojtczak, A.B. (1229) 249
Briantais, J.-M., see Vernotte, C. (1229) 296

Chernyak, B.V., Sigalat, C., Diolez, P. and Haraux, F.
Enzyme turnover is essential for deactivation of $F_0F_1$-ATPase in plant mitochondria (1229) 121
Cotton, N.P.J., see Bizouarn, T. (1229) 49
Croce, R., see Zucchelli, G. (1229) 59

Daniel, R., see Forster, A. (1229) 393
De Kok, A., see Visser, A.J.W.G. (1229) 381
Dell'Antone, P., see Macrì, F. (1229) 323
Demeter, S., Janda, T., Kovács, L., Mende, D. and Wiessner, W.
Effects of in vivo $CO_2$-depletion on electron transport and photoinhibition in the green algae, *Chlamydobotrys stellata* and *Chlamydomonas reinhardtii* (1229) 166
Diolez, P., see Chernyak, B.V. (1229) 121
Ducruet, J.-M., see Stallaert, V.M. (1229) 290

Edel, C.M., Hartog, A.F. and Berden, J.A.
Analysis of the inhibitory non-catalytic ADP binding site on mitochondrial $F_1$, using $NAP_3$-$2N_3$ADP as probe. Effects of the modification on ATPase and ITPase activity (1229) 103
Einarsdóttir, Ó.
Fast reactions of cytochrome oxidase (1229) 129

Featherstone, J., see Polgreen, K.E. (1229) 175
Ferber, D.M., Moy, B. and Maier, R.J.
*Bradhyrhizobium japonicum* hydrogen-ubiquinone oxidoreductase activity: quinone specificity, inhibition by quinone analogs, and evidence for separate sites of electron acceptor reactivity (1229) 334
Forster, A., Daniel, R. and Müller, V.
The $Na^+$-translocating ATPase of *Acetobacterium woodii* is a $F_1F_0$-type enzyme as deduced from the primary structure of its $\beta$, $\gamma$ and $\epsilon$ subunits (1229) 393
Freiberg, A., see Monshouwer, R. (1229) 373
Fromme, P., see Jekow, P. (1229) 115

Garlaschi, F.M., see Zucchelli, G. (1229) 59
Govindjee, see Vernotte, C. (1229) 296
Grace, S., Pace, R. and Wydrzynski, T.
Formation and decay of monodehydroascorbate radicals in illuminated thylakoids as determined by EPR spectroscopy (1229) 155
Grimley, R.L., see Bizouarn, T. (1229) 49
Grivell, L.A., see Boumans, H. (1229) 386
Gu, X.Z., Hayashi, M., Suzuki, S. and Lin, S.H.
Vibrational coherence and relaxation dynamics in the primary donor state of the mutant reaction center of *Rhodobacter capsulatus*: Theoretical analysis of pump-probe stimulated emission (1229) 215

Hägerhäll, C., Sled', V., Hederstedt, L. and Ohnishi, T.
The trinuclear iron-sulfur cluster S3 in *Bacillus subtilis* succinate:menaquinone reductase; effects of a mutation in the putative cluster ligation motif on enzyme activity and EPR properties (1229) 356
Haraux, F., see Chernyak, B.V. (1229) 121
Harper, M.-E., see Korzeniewski, B. (1229) 315
Harris, D.A., see Polgreen, K.E. (1229) 175
Hartog, A.F., see Edel, C.M. (1229) 103
Hayashi, M., see Gu, X.Z. (1229) 215
Hederstedt, L., see Hägerhäll, C. (1229) 356
Hicks, D.B. and Krulwich, T.A.
The respiratory chain of alkaliphilic bacteria (1229) 303
Hicks, D.B.
Purification of three catalase isozymes from facultatively alkaliphilic *Bacillus firmus* OF4 (1229) 347
Hinds, T.R., see Kellermayer, M.S.Z. (1229) 89
Hochkoeppler, A., Moschettini, G. and Zannoni, D.
The electron transport system of the facultative phototroph *Rhodoferax fermentans*. I. A functional, thermodynamic and spectroscopic study of the respiratory chain of dark- and light-grown cells (1229) 73
Hochkoeppler, A., Zannoni, D. and Venturoli, G.
The electron transport system of the facultative phototroph *Rhodoferax fermentans*. II. Flash-induced oxidation of membrane-bound cytochromes *c* (1229) 81
Hu, X., Zhang, J.-W., Persson, A. and Rydström, J.
Characterization of the interaction of NADH with proton pumping *E. coli* transhydrogenase reconstituted in the absence and in the presence of bacteriorhodopsin (1229) 64
Hutton, M., see Bizouarn, T. (1229) 49

Ida, S., see Aoki, H. (1229) 389
Imaeda, Y., see Miyoshi, H. (1229) 149
Iwamura, H., see Miyoshi, H. (1229) 149

Jackson, J.B., see Bizouarn, T. (1229) 49
Janda, T., see Demeter, S. (1229) 166
Jekow, P., Fromme, P., Witt, H.T. and Saenger, W.
Photosystem I from *Synechococcus elongatus*: preparation and crystallization of monomers with varying subunit compositions (1229) 115
Jennings, R.C., see Zucchelli, G. (1229) 59
Jiang, L., see Zhao, J. (1229) 39
Johnson, G.N., Rutherford, A.W. and Krieger, A.
A change in the midpoint potential of the quinone $Q_A$ in Photosystem II associated with photoactivation of oxygen evolution (1229) 202
Johnson, G.N., see Krieger, A. (1229) 193

Kellermayer, M.S.Z., Hinds, T.R. and Pollack, G.H.
Persisting in vitro motility of actin filaments at nanomolar ATP concentrations after ATP pretreatment (1229) 89
Kholodenko, B.N. and Westerhoff, H.V.
Control theory of group transfer pathways (1229) 256
Kholodenko, B.N. and Westerhoff, H.V.
How to reveal various aspects of regulation in group-transfer pathways (1229) 275
Klöhn, P.-C., Massalha, H. and Neumann, H.-G.
A metabolite of carcinogenic 2-acetylaminofluorene, 2-nitrosofluorene, induces redox cycling in mitochondria (1229) 363
Korzeniewski, B., Harper, M.-E. and Brand, M.D.
Proportional activation coefficients during stimulation of oxidative phosphorylation by lactate and pyruvate or by vasopressin (1229) 315
Koshkin, V.
Spatial and electrogenic properties of superoxide-producing cytochrome *b*-559 incorporated into liposomes (1229) 329
Kothen, G., Schwarz, O. and Strotmann, H.
The kinetics of photophosphorylation at clamped $\Delta$pH indicate a random order of substrate binding (1229) 208
Kovács, L., see Demeter, S. (1229) 166
Krieger, A., Rutherford, A.W. and Johnson, G.N.
On the determination of redox midpoint potential of the primary quinone electron acceptor, $Q_A$, in Photosystem II (1229) 193
Krieger, A., see Johnson, G.N. (1229) 202
Krulwich, T.A., see Hicks, D.B. (1229) 303

Lin, S.H., see Gu, X.Z. (1229) 215
Lübben, M.
Cytochromes of archaeal electron transfer chains (1229) 1

Macrì, F., Zancani, M., Petrussa, E., Dell'Antone, P. and Vianello, A.
Pyrophosphate and $H^+$-pyrophosphatase maintain the vacuolar proton gradient in metabolic inhibitor-treated *Acer pseudoplatanus* cells (1229) 323
Madeira, V.M.C., see Palmeira, C.M. (1229) 187
Maier, R.J., see Ferber, D.M. (1229) 334
Manasse, R.S., see Bendall, D.S. (1229) 23
Massalha, H., see Klöhn, P.-C. (1229) 363
Mende, D., see Demeter, S. (1229) 166
Miyauchi, M., Tozawa, K. and Yoshida, M.
$F_1$-ATPase $\alpha$-subunit made up from two fragments (1–395, 396–503) is stabilized by ATP and complexes containing it obey altered kinetics (1229) 225
Miyoshi, H., Tokutake, N., Imaeda, Y., Akagi, T. and Iwamura, H.
A model of antimycin A binding based on structure–activity studies of synthetic antimycin A analogues (1229) 149
Monshouwer, R., Visschers, R.W., Van Mourik, F., Freiberg, A. and Van Grondelle, R.
Low-temperature absorption and site-selected fluorescence of the light-harvesting antenna of *Rhodopseudomonas viridis*. Evidence for heterogeneity (1229) 373
Moreno, A.J., see Palmeira, C.M. (1229) 187
Moschettini, G., see Hochkoeppler, A. (1229) 73
Moy, B., see Ferber, D.M. (1229) 334
Müller, V., see Forster, A. (1229) 393
Müller, V., see Spruth, M. (1229) 96
